5 February 2020

Dear Representative:

As organizations dedicated to a sustainable future, we believe that such a future must include fair treatment for the people and communities working to build a clean and thriving economy. For that reason, we support H.R. 2474, the Protecting the Right to Organize (PRO) Act, and urge you to vote in favor of the bill when it comes before the House this week.

Since 1970, global carbon dioxide emissions have nearly doubled, spiking the frequency and intensity of natural disasters, increasing the risk of drought, and putting the future of our entire planet at risk. Over that same period, income and wealth inequality have exploded in the United States and elsewhere — incomes have risen by 229% in the U.S. for the top 1% of earners since 1979, while the bottom 90% of households have seen income growth of just 46%, or 1% on an annual basis.¹ These parallel trends reflect an economy built to serve the interests of a small group of the extremely wealthy and powerful, not people or the planet.

One key element of fixing our broken economic system is ensuring that working people have a voice in the economy and earn a fair day's pay for a fair day's work. Workers are often unable to have their voices heard or to earn fair pay, a function of weak labor laws that have made it virtually impossible for workers to organize and form unions in the face of unrelenting, aggressive corporate opposition.

The PRO Act would make common-sense changes to existing law to enable workers who want to organize and form unions to do so. It would penalize corporations that break the law, limit tactics used to intimidate workers, help workers who organize secure timely collective bargaining agreements, and institute a number of changes to better enable workers to act in solidarity with one another.

Remaking our economy and environment to address climate change and rising inequality will require substantial investment and transition, across many sectors. This is an opportunity to create millions of good jobs with family-sustaining wages and strong worker protections. We need strong, common-sense worker protections like those in the PRO Act to ensure that a sustainable economy reverses rather than reinforces rising inequity. There is no way to build a greener, more inclusive economy without strong, thriving labor unions.

---

Our planet and our communities are under enormous threat. We must act urgently to confront the dangers imposed by climate change, including by ensuring that working people are treated fairly and helping lead the transition to a fair, green economy. The PRO Act would help advance that goal and help us rebuild our economy to function for both people and the planet. Therefore, we urge you to vote in favor of the PRO Act.

Sincerely,
